RAJ KANSAL

DevOps Engineer | Platform & Observability | Cloud-Native | CI/CD
Noida, India | +91-8057705464 | rajkansal2000@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Results-driven Platform and Observability Engineer with 2+ years of experience across DevOps, cloud-native infrastructure, and monitoring domains. Proven track record of building and maintaining CI/CD pipelines, containerized workloads, and infrastructure-as-code solutions. Skilled at collaborating with cross-functional SRE and development teams, automating operational workflows, and delivering measurable improvements in platform reliability and performance.

PROFESSIONAL EXPERIENCE

Platform Engineer – DevOps | **Lumiq, Noida** | *Mar 2025 – Dec 2025*

- Designed, supported, and maintained cloud-native platforms ensuring high availability, scalability, and reliability.
- Built and managed CI/CD pipelines using Jenkins and GitHub Actions to automate build, test, and deployment workflows.
- Containerized applications using Docker and deployed workloads on Kubernetes clusters.
- Implemented Infrastructure as Code (IaC) using Terraform for repeatable and scalable infrastructure provisioning.
- Monitored platform health using KPIs, SLIs, and SLOs; handled incident response and on-call escalations.
- Collaborated with developers and SRE teams to troubleshoot deployment, performance, and infrastructure issues.

Observability / DevOps Engineer | **CloudEQ, Chandigarh** | *Jan 2024 – Jan 2025*

- Configured New Relic APM, Browser, and Infrastructure monitoring for Node.js applications, providing real-time insights into performance metrics such as page load times, CPU utilization, and memory usage.
- Integrated Splunk with New Relic to enhance monitoring and analytics capabilities, enabling comprehensive log management and performance insights.
- Developed and maintained CI/CD pipelines using Jenkins and Maven, ensuring efficient build and deployment workflows.
- Contributed to key client projects including ASDA, Red Bull, and Equiniti by customizing solutions and fostering effective cross-functional collaboration.
- Worked extensively with MySQL and PostgreSQL for database management — optimizing queries, ensuring data integrity, and improving database performance.

CORE COMPETENCIES & SKILLS

- **DevOps & CI/CD:** Jenkins, GitHub Actions, Maven, Gradle, Git/Stash, Nexus, Puppet, Chef
- **Observability & Monitoring:** New Relic (APM, Browser, Infrastructure), Splunk, Datadog, Prometheus, Grafana
- **Cloud & Infrastructure:** AWS, Azure, Terraform (IaC), Infrastructure as Code
- **Containerization & Orchestration:** Docker, Kubernetes
- **Languages & Scripting:** Python, C++, HTML, CSS
- **Databases:** MySQL, PostgreSQL – query optimization, schema design, stored procedures

EDUCATION & CERTIFICATIONS

B.E., Computer Science Engineering — **Chitkara University** | *March2020 – April2024*

Certifications: New Relic Partner Practitioner & Advanced Practitioner | ISEA Certified Cyber Hygiene Practitioner | Cisco Introduction to IoT | Coding Ninja – Design & Analysis of Algorithms, Advanced Web Development, OOP | Kaya – Global Disaster Risk Reduction Pathway
